

POLAK CZ

Cupboards for fire brigade
and emergency services

Wardrobes for fire brigades and emergency services

POLAK wardrobe cabinets for fire brigades and emergency services were developed in cooperation with firefighters and thus meet the basic requirements for the demanding work of these forces. The lockers are designed in different variants with separate compartments for "white part - personal clothing" and "operational clothing - black part". The lockers are equipped with an anti-breakage device. The opening angle is more than 90°. A wide range of accessories offers everything emergency services need to carry out their demanding profession.

Helmet holder

Height-adjustable helmet holder, can be mounted on the roof
Height: 210 - 310 mm (adjustable in 20 mm steps)

Insertion slot

for convenient insertion of documents without opening the door (size: 200 x 22 mm)

Clothes rail with metal hooks

Clothes rail with three metal hooks in each wardrobe compartment. The oval shape of the clothes rail makes it possible to hang up heavy clothes

Perforated rail for hanging programme

Different types of hooks can be attached to the perforated rail

Locks

two types - cylindrical or mechanical code lock

Perforated undershelf

for dirt removal and wardrobe ventilation

Feet

Height: 120 mm, height adjustable

Combined FW wardrobes
